Important remarks:

- Mixing directions can change depending on the price and quality of local available raw materials.
- To achieve good results, follow up on the mixing instructions! Do not alter or change without consult.
- For the best results; start with the Koudijs Galdus 2mm pre-starter (minimum 150 gram/bird total, preferably more).
- In case of no oil; replace the oil with corn. Note that FCR is likely to increase.
- Always make sure all birds have access to enough feed.
- To avoid drop in feed intake; ensure the change of feeds (from Starter to Grower feed etc.) happens gradually.
- Ensure proper quality of the limestone used. Quicktests are available, ask your local representative for more information.
- Be biosecurity wise; use disinfection materials, keep separate shoes for the bird houses only.
- Make sure birds always have access to fresh, cool and clean water.
- In case of management related issues, ask for the Koudijs Management Guide.
